

Fiche de totem : Garmin Nuvi Update

Garmin's line of Nuvi GPS devices allow business users to plot their routes and get directions for all motor vehicle trips. However, a GPS unit is only as good as the maps installed on it, and there are times when the map needs to be updated to accommodate new infrastructure, relocated businesses, and other changes. MyGeolocate is one of the best providing these services , check out their website.<https://mygeolocate.com/garmin-nuvi-map-update/>
